npm

Peter Larsson-Green

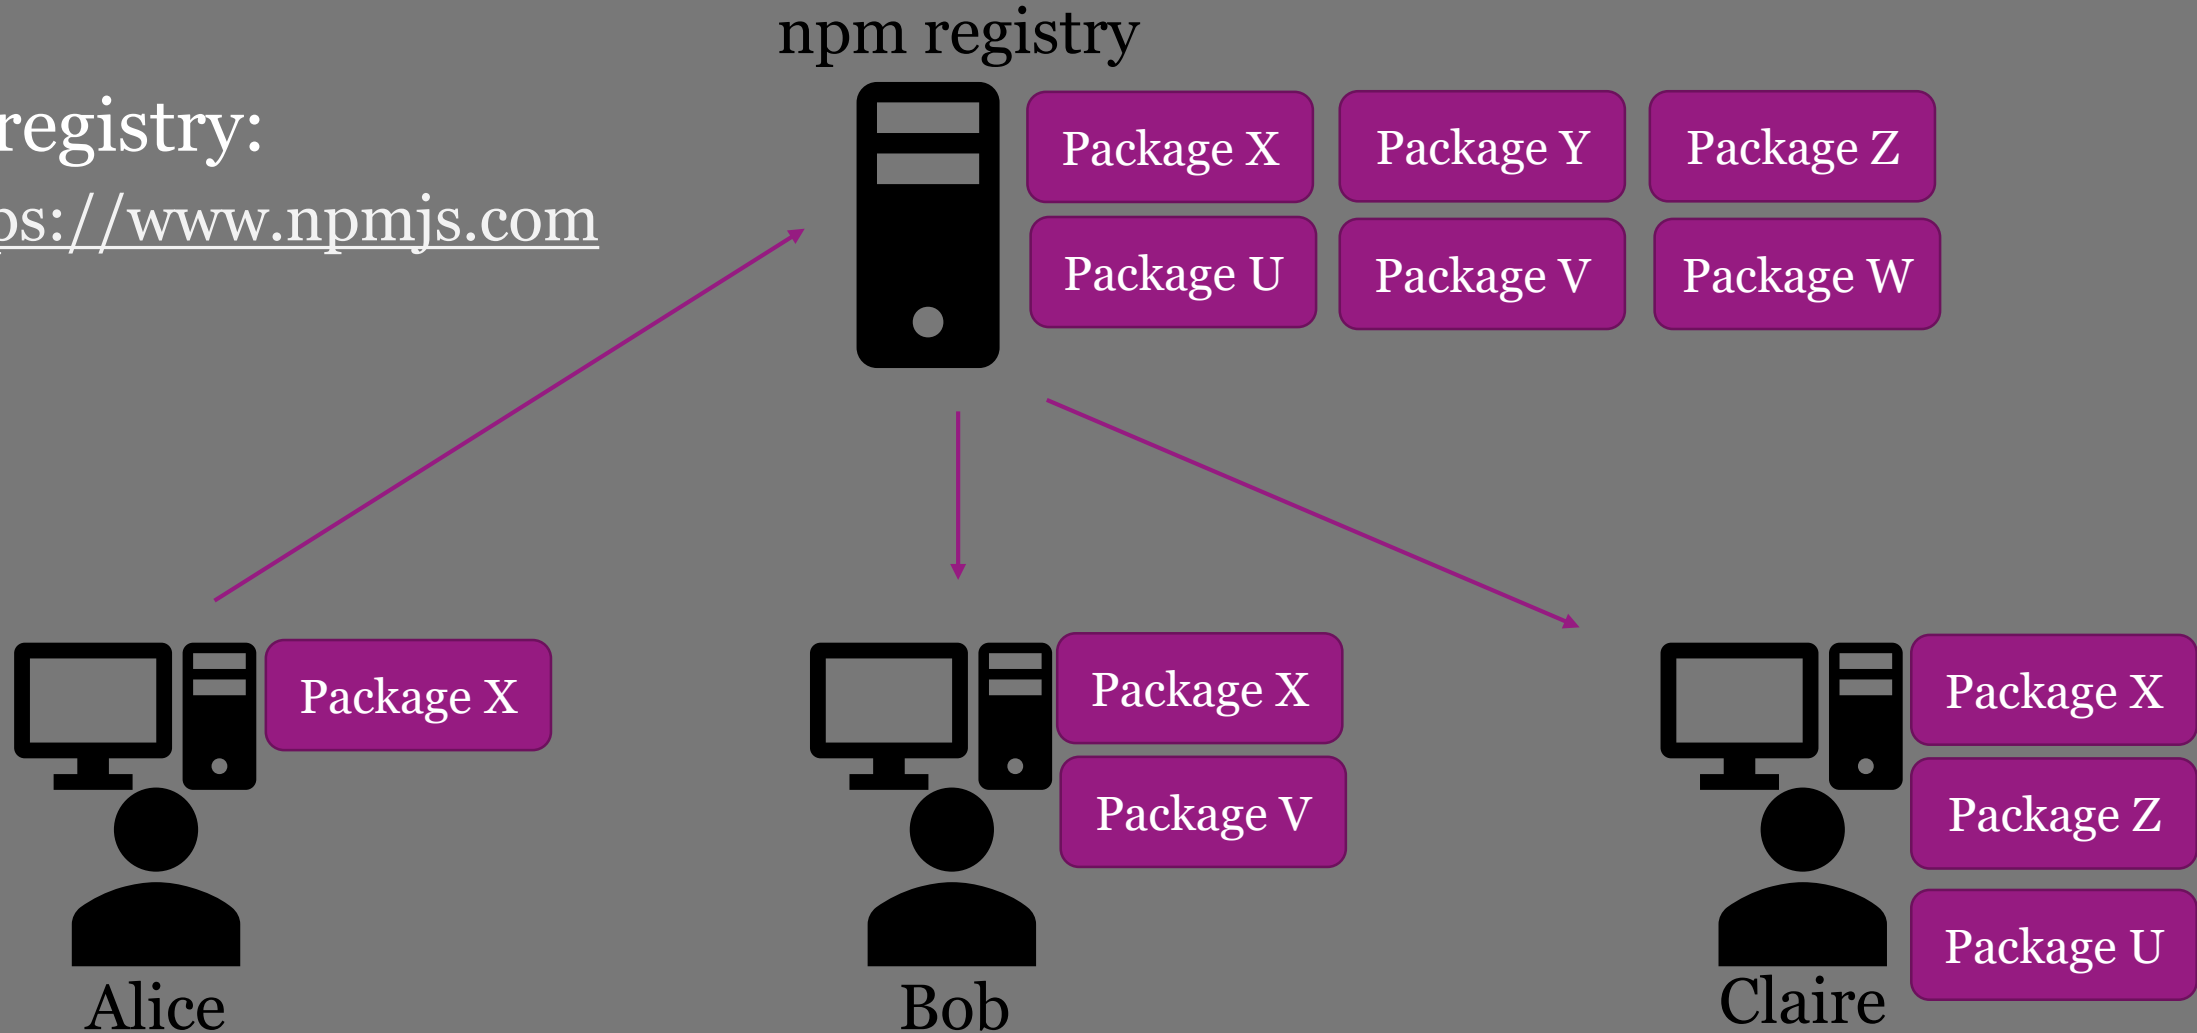

Jönköping University

Autumn 2018

WHAT IS IT?

The registry:

<https://www.npmjs.com>

HOW DO I USE NPM?

1. Install npm on your computer.
 - npm is the default package manager for Node.js.
2. Use the `npm` command to:
 - Setup npm for your Node.js project.
 - Download npm packages to your Node.js project.

EXAMPLE

```
mkdir my-nodejs-project  
cd my-nodejs-project  
npm init --yes  
npm install express
```

```
const express = require('express')  
// ...
```

my-nodejs-project/main.js

```
{  
  "name": "my-nodejs-project",  
  "version": "1.0.0",  
  "dependencies": {  
    "express": "^4.16.3"  
  }  
}
```

my-nodejs-project/package.json

EXAMPLE

Practicable demonstration.

NPM SCRIPTS

```
{  
  "name": "my-nodejs-project",  
  "version": "1.0.0",  
  "dependencies": {  
    "express": "^4.16.3"  
  },  
  "scripts": {  
    "start": "node main.js"  
  }  
}
```

package.json

To run script:

- npm run start
